

Select Cockspur

Cockspur handle

For use on timber windows

Select Cockspur is a locking window handle for timber windows that is available with a suited casement stay. Select Cockspur features a compact design that has a very low 28mm

stack height for ease of window transit and is available in a variety of plated or painted finishes and the option of plastic or metal keeps.

Features & Benefits

- **Specifically designed for timber windows**
- **Minimal projection for ease of window stacking**
- **Unique lead-in on handle nose**
- **Section related non-handed narrow wedge**
- **Handle incorporates sash lift**
- **Locking, non-locking or Fire Escape versions**
- **Metal keep option for added security**
- **Handle uses same lock and key as Select Casement Stay**
